

# Drone Zoro

## Portable UAVs-Defender System

This Anti-drone weapon is designed to disable the hostile unmanned aerial vehicles (UAVs) , it can utilizes radio waves to take the hostile flying Drones down but without any damage to them.

**Name: Portable Drone-defender**  
**Model: DZ-02 Pro**

## Features:

- With Light-weight less than 5 kilograms
- 1km effective distance
- Overwhelming signals including 2.4Ghz, 5.8Ghz, GPS(USA), Galileo(Europe) , Gallonass (Russia), Beidou(China)
- Two mode options forcing drones to land or return to its point of origin.

## Specification DZ-02 PRO

### Jammer Specifications

Voltage: 12V  
Runtime: 35-40 min (Continuous working)  
Max distance: Up to 1km  
Jammer frequencies:  
WIFI: 2.4Ghz-2.5Ghz; 5.725Ghz-5.825Ghz;  
GNSS: 1.56Ghz-1.61Ghz;  
Body Weigh: 4.8KG (Including Battery)  
Body Dimension: L890xW380xH140mm

### Warranty

24 months from date of shipment

### Antenna Specifications

Antenna Gain 8dB  
V-Plane: 60 degrees  
Environment Operating temperature: -10℃ to + 50℃

### Battery Specifications

Built-in Lithium Battery 12V,10Ah  
Operating Temperature: -10℃ to + 50℃

## Counter Drone Detection System

# Portable Unit

The portable unit is designed for temporary events, mobile deployments, and similar scenarios. The entire unit is enclosed in a single carrying case, which allows users to quickly begin operating in a new or mobile location. The portable unit can be powered by onboard TB50 Intelligent batteries or by an available power supply. It works flexibly on the move, providing convenient drone-monitoring solutions for emergencies and wherever stationary units are not available.

Convenient

5 km Range

Offline Use
